Introduction

1.1 About Zenith

Zenith assembles auditors with proven track records: finding critical vulnerabilities in public audit competitions.

Our audits are carried out by a curated team of the industry's top-performing security researchers, selected for your specific codebase, security needs, and budget.

Learn more about us at <https://zenith.security>.

1.2 Disclaimer

This report reflects an analysis conducted within a defined scope and time frame, based on provided materials and documentation. It does not encompass all possible vulnerabilities and should not be considered exhaustive.

The review and accompanying report are presented on an "as-is" and "as-available" basis, without any express or implied warranties.

Furthermore, this report neither endorses any specific project or team nor assures the complete security of the project.

1.3 Risk Classification

SEVERITY LEVEL	IMPACT: HIGH	IMPACT: MEDIUM	IMPACT: LOW
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

2

Executive Summary

2.1 About Bridge

Bridge gives everyone access to world-class financial services. We believe stablecoins will transform and improve global money movement. Bridge creates the infrastructure necessary for builders to take full advantage of this new medium.

Since launching 18 months ago, we've provided millions with faster and cheaper access to cross-border payments, enabled governments and aid agencies to more efficiently distribute funds to thousands, and given millions more true economic choice, enabling them to easily save and spend in USD or EUR. Bridge gives everyone access to world-class financial services. We believe stablecoins will transform and improve global money movement. Bridge creates the infrastructure necessary for builders to take full advantage of this new medium.

2.2 Scope

The engagement involved a review of the following targets:

Target	stablecoin-template
Repository	https://github.com/withbridge/stablecoin-template
Commit Hash	433b5473fa7207d88c2e11d5d501452b4bb2d807
Files	Changes in branch foundry-take-2

2.3 Audit Timeline

July 15, 2025	Audit start
July 17, 2025	Audit end
July 29, 2025	Report published

2.4 Issues Found

SEVERITY	COUNT
Critical Risk	0
High Risk	0
Medium Risk	0
Low Risk	0
Informational	1
Total Issues	1

3

Findings Summary

ID	Description	Status
I-1	Incorrect comment in StablecoinTemplateV3	Resolved

4

Findings

4.1 Informational

A total of 1 informational findings were identified.

[I-1] Incorrect comment in StablecoinTemplateV3

SEVERITY: Informational

IMPACT: Informational

STATUS: Resolved

LIKELIHOOD: Low

Target

- [StablecoinTemplateV3.sol](#)

Description:

In StablecoinV3Template, the `_beforeTokenTransfer()` logic has been replaced with an override of `_update()` function, to imitate similar blacklist behavior for token transfers.

But one comment on Line 179 still refers to the `_beforeTokenTransfer()` function.

Recommendations:

Modify the comment.

Bridge: Resolved with [PR-15](#)

Zenith: Verified.
